Prostate Cancer Screening

What is Prostate Cancer?

The prostate is a gland in the male reproductive system. Cancer occurs when cells of the prostate mutate and begin to multiply out of control. These cells may spread from the prostate to other parts of the body, especially the bones and lymph nodes.

At Raffles Hospital, we offer prostate cancer screening by our Consultant Urologist, which comprises the following:

- Consultations (2 visits) with Consultant Urologist
- Screening blood test, ie. Prostate Specific Antigen (PSA) test
- Transrectal ultrasound and prostate biopsy, ie. Removal of a tiny piece of prostate tissue for examination under a microscope
- Uroflowmetry
